SRINIDHI SHANKAR JAIN

Phone Number: +49 15510597586
Email Address: Srinidhi.shankar.jain@outlook.com
LinkedIn: Srinidhi Shankar Jain
Place of Residence: Berlin, Germany
Date of Birth: 13th October 2000

SUMMARY

Mechatronics engineer with practical experience in control systems and automation. Familiar with PLC programming and passionate about integrating mechanical, electrical, and software systems. Currently learning AI for industrial automation and upskilling in automation programming tools.

TECHNICAL SKILLS

- **Mechanical & Mechatronics Engineering:** CAD (Fusion 360, SolidWorks), MATLAB.
- **Industrial Automation & Controls:** PLC Programming (LD, FBD, CFC), Codesys, RSLogix 500 (Emulator), RSLinx.
- **Programming & Scripting:** Python, C++, Java.

PROFESSIONAL EXPERIENCE

REVO FOODS Gmbh [Vienna, Austria] **09/2024 – 02/2025**

Mechatronics Engineering Intern

- Design and 3D printing of a housing, as well as development of a motor test station for simultaneous testing of stepper and servo motors.
- Conducted research on Siemens Sinumerik and other automation systems; created schematic diagrams with Draw.io to support system upgrades.
- Developed a virtual factory environment using Factory I/O to test PLC code and validate conveyor and machine operations.
- Researched and evaluated actuators compatible with Profibus and Profinet; analyzed safety standards and sustainability of components.

EDUCATION

Bachelor of Engineering in **Mechanical Engineering**
New Horizon College of Engineering, Bengaluru, India | 07/2018 – 07/2022
Grade: 1.8 (Rank Holder)

Masters of Engineering in Mechatronics & Robotics
Schmalkalden University of Applied Sciences, Schmalkalden, Germany | 10/2023 – Present

PROJECTS

TWO-DIMENSIONAL PEN PLOTTER

Objective: To design and develop a high-precision XY pen plotter that can reliably draw complex architectural drawing such as Nicolaus House.

Responsibilities:

- Designed and 3D-printed custom parts using CAD software.
- Conducted code testing, debugging, and calibration to ensure high-precision performance.
- Developed and implemented the V-model development process to integrate mechanical, electronic, and software components.

ANOMALY DETECTION FOR PREDICTIVE MAINTENANCE

Objective: To design and develop a predictive maintenance system that detects anomalies in real-time, reducing downtime and improving operational efficiency.

Responsibilities:

- Developed a predictive maintenance solution for a mechatronic system using Python and Jupyter Notebook, enabling early detection of potential failures.
- Implemented anomaly detection algorithms on sensor data, improving system reliability through proactive maintenance insights.
- Visualized and analyzed machine sensor patterns to identify abnormal behavior, enhancing understanding of operational risks.

DOSING MACHINE PLC PROJECT

Objective: To develop a PLC-controlled dosing machine with interactive HMI visualization, demonstrating material handling, mixing operations, and motor control.

Responsibilities:

- Programmed control logic using LD, FBD, and CFC in RSLogix 500 emulator.
- Created interactive HMI with animations for silos, spiral conveyors, mixers, and motor status indicators.
- Linked variables to control start/stop operations, motor states, and material levels for real-time visualization.
- Implemented FSM and trigger-based sequencing for accurate dosing and process flow.

WEBSITE DEVELOPMENT [CV Website]

Objective: To design and deploy a professional personal website serving as an online CV, showcasing skills, experience, and projects in a structured and engaging format.

Responsibilities:

- Built a responsive portfolio website using React (JSX, JavaScript) with CSS for styling, ensuring a modern and user-friendly interface.
- Deployed the website using Vercel, enabling fast, reliable, and scalable online access for recruiters and networking purposes.

CERTIFICATIONS

- From Wire to PLC, A Bootcamp in Industrial Automation Course.
- Complete A.I. & Machine Learning, Data Science Bootcamp

AWARDS & RECOGNITION

- **Deutschlandstipendium 2024 -** Awarded at Schmalkalden University of Applied Sciences
- **IEEE Bengaluru Section** Best Student Volunteer Award 2023

HOBBY

Piano, Volleyball, Badminton and Archery
